

Kartup Maxi

Kartup Maxi truck is the only one in the world that lifts and lowers the electric and internal-combustion karts on hire.

It works through a 12Volt cc electric command and hydraulic system.

Thanks to a led display the battery charge level is always visible.

It can be moved by push and without any physical effort even when fully loaded, thanks to its simplicity it can be used by anyone and with any model of kart on hire.

This truck not only serves to move the kart, but it can also be used as base of work for the maintenance and the starting of the kart.

Kartup Maxi is produced with high quality materials and it does not need any maintenance.

Kartup is a Patent and CE Certificate model.
